A mind map is a diagram used to visually organize information. A mind map is hierarchical and shows relationships among pieces of the whole. It is often created around a single concept, drawn as an image in the center of a blank page, to which associated representations of ideas such as images, words and parts of words are added.

Mind map - Wikipedia

This site serves as a resource site for students in Biology 1 & 1A. The goal of this course is to provide a general overview of major biological topics, provide opportunities for laboratory investigations, and expose students to current advances in biology and medicine.

Animal classification is the categorizing of animals and organisms hierarchically.. The ranking system is based on a fixed number of levels such as kingdom, family, or genus. The order goes: Animal classification is based on an organisms decent from a common ancestor.

Animal Classification - Biology | Socratic

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

What Is a Map? Just like your house key opens your front door, a map key or legend opens up a map. The map key is what gives you all the information you need for a map to make sense.

What is a Map Key/Legend? - Definition, Symbols & Examples

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.
