Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Biology - Wikipedia

Tumor-suppressor genes act primarily through their influence on the cell cycle. The life cycle of a cell that divides can be described by a four-phase cell cycle composed of M phase, G 1 phase, S phase, and G 2 phase. M phase is the phase of mitosis, when the cells physically divide. G 1 phase is the first Gap phase (or Growth phase), which occurs immediately after mitosis.
