Abstract. Paul begins this essay by developing the notion that all human action presupposes the use of humanly created logical systems that model, abridge, and summarize the features of the world about us, and that abstract inferential systems, and the reasoning they make possible, are as natural to us as a species as swimming is to a dolphin or flying is to a bird.

Why Students and Teachers Donât Reason Well

The question-answer relationship (QAR) strategy helps students understand the different types of questions. By learning that the answers to some questions are "Right There" in the text, that some answers require a reader to "Think and Search," and that some answers can only be answered "On My Own," students recognize that they must first consider the question before developing
