44. Extreme points on flattened spheres The equation $x^2n + y^2n + z^2n = 1$, where n is a positive integer, describes a flattened sphere. Define the extreme points to be the points on the flattened sphere with a maximum distance from the

Lagrange Multipliers with Two Independent Variables ...

Jack, an instructor at Columbia Business School, taught his online entrepreneurship course asynchronously through his institution LMS. He was interested in incorporating a Wiley business text into his course, but wanted to deliver this Wiley content seamlessly with his own reading materials and video content.

Course Catalog | WileyPLUS

The area of study known as the history of mathematics is primarily an investigation into the origin of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical methods and notation of the past. Before the modern age and the worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales.
