With the traditional method of math instruction -- the way many of us were taught -- the goal was to get the right answer. Our instructional model, however, requires students to explain and show their thinking. Today we'd like to share some of the cognitive and learning science research behind this approach, and why it's so important that students explain their reasoning.

Why Students Need to Explain Their Reasoning

CS Fundamentals Express combines the best of Courses A-F into a single condensed course (with a simpler option for pre-readers). We recommend Courses A-F for most classrooms, but if your school only offers one computer science course or you want to have your students work through multiple courses in a single year, the Express course is a better choice.

It is a responsibility we are failing to meet. According to statistics from the U.S. Department of Education, the gap in eighth-grade reading and math test scores between low-income students and their wealthier peers hasn't shrunk at all over the past 20 years. (The gap between poor and wealthier fourth-grade students narrowed during those two decades, but only by a tiny amount.)
