Mike, architecture major, Summer 2010 This calculus course was very convenient in the sense that it was online and 4 credits without any major prerequisite. But over the summer I took this class while taking another online class and working 40 hours a week. This calculus class is not good for someone who plans on doing too many other things over the summer.

of calculus or infinitesimal calculus, is a history of a mathematical discipline focused on limits, functions, derivatives, integrals, and infinite series. Isaac Newton and Gottfried Leibniz independently invented calculus in the mid-17th century. A rich history and cast of characters participating in the development of calculus both preceded and followed the contributions of these singular ...

Zeno's paradoxes are a set of four paradoxes dealing with counterintuitive aspects of continuous space and time. 1. Dichotomy paradox: Before an object can travel a given distance d , it must travel a distance $d/2$. In order to travel $d/2$, it must travel $d/4$, etc. Since this sequence goes on forever, it therefore appears that the distance d cannot be traveled.

In calculus, the indefinite integral of a given function (i.e., the set of all antiderivatives of the function) on a connected domain is only defined up to an additive constant, the constant of integration. This constant expresses an ambiguity inherent in the construction of antiderivatives. If a function $f(x)$ is defined on an interval I and $F(x)$ is an antiderivative of $f(x)$, then the set of all ...
