Not to be confused with the DNA barcode involved in optical mapping of DNA.. DNA barcoding is a method of species identification using a short section of DNA from a specific gene or genes. That DNA section (also called "sequence") can be used to identify an organism; in the same way as a supermarket scanner uses the familiar black stripes of the UPC barcode to identify a purchase.

DNA barcoding - Wikipedia

This page contains general information about Revolution flea control, commonly prescribed by veterinarians as a highly-effective, semi-rapid (within 24-36 hours), monthly, spot-on flea, mite, tick (only some ticks), worm and heartworm control product for cats and dogs.
