MathWorks products provide all the tools you need to develop mathematical models. MATLAB[®] supports both numeric and symbolic modeling approaches and provides curve fitting, statistics, optimization, ODE and PDE solving, calculus, and other core mathematical tools. Simulink[®] adds an environment for modeling and simulating the behavior of multidomain systems and for developing embedded systems.

Mathematical Modeling - MATLAB & Simulink Solutions

The need to develop a mathematical model begins with specific questions in a particular application area that the solution of the mathematical model will answer. Often the mathematical model developed is a mathematical "find" problem such as a scalar equation, a system of linear algebraic equations, or a differential equation.
