Cantor Set. The Cantor set, sometimes also called the Cantor comb or no middle third set (Cullen 1968, pp. 78-81), is given by taking the interval (set), removing the open middle third ( ), removing the middle third of each of the two remaining pieces ( ), and continuing this procedure ad infinitum. It is therefore the set of points in the interval whose ternary expansions do not contain 1 ...

I had never made a raised panel door before and was a little concerned about a 3.5” bit spinning at 12,000 RPM so close to my hands. This bit was very smooth in operation and did leave a surface that required no sanding even across the grain.

Plastic debris has been documented in all marine environments, from coastlines to the open ocean (Barnes et al 2009), from the sea surface to the sea floor (Schluning et al 2013), in deep-sea sediments (Woodall et al 2014) and even in Arctic sea ice (Obbard et al 2014). The best-measured reservoir of plastic marine debris on a global scale is that of buoyant plastics floating at the sea surface.

`lua_checkstack [-0, +0, -] int lua_checkstack (lua_State *L, int extra);` Ensures that there are at least extra free stack slots in the stack. It returns false if it cannot fulfill the request, because it would cause the stack to be larger than a fixed maximum size (typically at least a few thousand elements) or because it cannot allocate memory for the new stack size.

In building a lot of LEGO Architecture models and sorting through 50 pounds of used LEGO bricks, I learned that a well organized brick collection is a requirement. I agree with most LEGO builders that the best way to sort a large LEGO collection is by part, rather than by color.
