Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

A not always very easy to read, but practical copy & paste format has been chosen throughout this manual. In this format all commands are represented in code boxes, where the comments are given in blue color. To save space, often several commands are concatenated on one line and separated with a semicolon ';

Tensegrity (tension-integrity) is a structural system recognized for its distinct compression elements that are suspended or appear to 'float' within the tensioned network, and the importance of this was first recognized by the inventor Buckminster Fuller and sculptor Kenneth Snelson in the mid-twentieth century. Since then, tensegrity has expanded into architecture, the building of ...
