Epigenetics. You keep using that word. I do not think it means what you think it means. I realize I overuse that little joke, but I can't help but think that virtually every time I see advocates of so-called "complementary and alternative medicine" (CAM) or, as it's known more commonly now ...

Epigenetics: It doesn't mean what quacks think it means ...

A central organizing concept in biology is that life changes and develops through evolution, and that all life-forms known have a common origin. The theory of evolution postulates that all organisms on the Earth, both living and extinct, have descended from a common ancestor or an ancestral gene pool. This universal common ancestor of all organisms is believed to have appeared about 3.5 billion ...
