Aerobic respiration is the process most living things undergo to use food energy. Here, we will investigate the definition, the steps of the process, what goes in and what comes out of the process ...

Aerobic Respiration: Definition, Steps, Products & Equation

The largest organisms now found on Earth can be determined according to various aspects of an organism's size, such as: mass, volume, area, length, height, or even genome size. Some organisms group together to form a superorganism (such as ants or bees), but such are not classed as single large organisms. The Great Barrier Reef is the world's largest structure composed of living entities ...

Summary. A little over 50 years ago, Sydney Brenner had the foresight to develop the nematode (round worm) *Caenorhabditis elegans* as a genetic model for understanding questions of developmental biology and neurobiology. Over time, research on *C. elegans* has expanded to explore a wealth of diverse areas in modern biology including studies of the basic functions and interactions of eukaryotic ...

Feeding behaviour: Feeding behaviour, any action of an animal that is directed toward the procurement of nutrients. The variety of means of procuring food reflects the diversity of foods used and the myriad of animal types. The living cell depends on a virtually uninterrupted supply of materials for its metabolism.

An Ovipositing Wasp in Russia - Observation of the Week, 5/3/19. Our Observation of the Week is this ovipositing Atanycolus wasp, seen in Russia by ropro!. In my experience, most people associate the word "wasp" with members of the Vespidae family, such as hornets and paper wasps. And for good reason, as many of them are large, colorful, often found around humans, and can deliver a painful sting.
