Linear System Theory Sol - Solutions Manual LINEAR SYSTEM... If $x(t) = 0$ at an isolated point, then continuity arguments show that the result is valid. Note that for the differentiable function $x(t) = t$, $x(t) = t$ is not differentiable at $t = 0$. Thus we must make the assumption that $x(t)$ is differentiable.

This course provides an introduction to the modern state space theory of linear systems for students of circuits, communications, controls, and signal processing. In some sense it is a second course in linear systems, since it builds on an understanding that students have seen linear systems in use in at least some context before.
