The Female Reproductive System Almost all of a female's sexual organs are located inside the body. Just as a male has a pair of testes, a female has a pair of ovaries (singular ovary). The ovaries contain the female sex cells (eggs) and produce the hormone estrogen. Ovaries are located in a female's abdomen as shown in the image below.

AES TG Section D - sepuplhs.org

In the human reproductive process, two kinds of sex cells (gametes), are involved: the male gamete (sperm), and the female gamete (egg or ovum). These two gametes meet within the female's uterine tubes located one on each side of the upper pelvic cavity, and begin to create a new individual.
