6. This brings us to the evolution of one of the two main state variables in our framework, political institutions (the other state variable is the distribution of resources, including distribution of physical and human capital stocks, etc.). Political institutions and the distribution of resources are the state variables in this dynamic system because they typically change relatively slowly ...

Law is a system of rules that are created and enforced through social or governmental institutions to regulate behavior. It has been defined both as "the Science of Justice" and "the Art of Justice". Law is a system that regulates and ensures that individuals or a community adhere to the will of the state.

Law - Wikipedia

1. Introduction. There is now widespread recognition that demographic change can have a profound and positive impact on economic growth, during the period in which declining mortality and fertility rates underpin a rising share of the working-age population and hence a boost to per capita income growth, known as a 'demographic dividend' (Asian Development Bank, 2011, Bloom and Williamson ...

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
