Students come into my math class with some sort of background with scatter plots. They generally have an understanding of how graphs work, so identifying if the graph has a positive, negative, or no correlation is pretty simple for them to figure out.

10 Activities to Help Students Practice Properties of ...

Purpose. To carry out an investigation in order to answer a central question: Does soap float? Context. In this lesson, students will form hypotheses and carry out an investigation in order to answer a central question: Does soap float?

Does Soap Float? - Science NetLinks

Task 1.2. What is the fundamental difference between experimental and correlational research? In a word, causality. In experimental research we manipulate a variable (predictor, independent variable) to see what effect it has on another variable (outcome, dependent variable).

The Bucket Buddies project offers your class an opportunity to further investigate pond life and the kinds of animals that inhabit ponds. Bucket Buddies collects information from classrooms worldwide to see if the same kinds of macro-invertebrates (visible animals without backbones) live in freshwater areas in different regions.

Inductive reasoning is a method of reasoning in which the premises are viewed as supplying some evidence for the truth of the conclusion; this is in contrast to deductive reasoning. While the conclusion of a deductive argument is certain, the truth of the conclusion of an inductive argument may be probable, based upon the evidence given.. Many dictionaries define inductive reasoning as the ...
