The Science Spot

It's SELECTION change, so yes the click does fire the event, if the cell is not selected already. My workaround was that when the cell was selected, I executed the macro and then changed the selection to a non-important cell (The change was done inside the executed code) (With selection change you cannot click on the same cell more than one time consecutively and thus execute the macro ...

2. Create a named range. You can actually skip this step and create your drop-down list based on a range of cells, but named ranges really make managing Excel drop-down lists easier.. Select all the entries you want to include in the drop down list, right-click them, and choose Define Name from the context menu. Alternatively, you can click Name Manager on the Formulas tab or press Ctrl + F3.

Excel drop-down list - how to create, edit and remove data ...

Short tandem repeats or STRs are repetitive sequence elements 3-7 base pairs long scattered throughout the human genome. By amplifying and analyzing these polymorphic loci, then comparing the resulting STR profile to that of a reference sample, the origin of biological samples such as cells or tissues can be identified and verified.
