Quiz: Lymphatic System - Irn.org

The lymphatic system is a one-way vascular network in vertebrates that works in parallel with the blood circulation . It drains interstitial fluid from most of the body's organs, with the exceptions of bone marrow, the retina, the central nervous system, and some avascular tissues (the cornea, cartilage, hair, nails, and epidermis).

Lymphatic system - AccessScience from McGraw-Hill Education

The lymphatic vasculature is an integral component of the circulatory and immune systems. 1 It is composed of a network of vessels that interconnect the body's interstitial spaces with the lymphoid organs (lymph nodes, spleen, thymus, and so on) and the systemic circulation. The lymphatic system is essential in maintaining the fluid homeostasis and optimal functioning of the immune system.
