New subadvised exchange-traded fund activities fluctuate from year to year, but subadvised ETF assets have been steadily rising. There is a higher demand for subadvisers that are trading-oriented rather than intellectual capital-oriented within the subadvised ETF market, although the need for providers of investment strategy in ETFs has also grown.

This is more of a "How to build your own algotrading strategy - the Ethereum edition" and not a "make money fast" blog post.. It is also a real example with real returns (and real production errors that cost me money) where you can see how to identify opportunities, why algotrading is awesome and why risk management can save your ass.
