"This leads us to the how [stet] the equity market determines the 'neutral policy rate'. I have argued in the past that we need to get away from the idea of some magic level of the interest rate that somehow brings inflation to 2% and the economy to full employment.". Eric is even clearer in his tweets in which he asserts that "stock prices determine  $r^*$ ".

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

The Great Depression was a severe worldwide economic depression that took place mostly during

the 1930s, beginning in the United States. The timing of the Great Depression varied across nations; in most countries it started in 1929 and lasted until the late-1930s. It was the longest, deepest, and most widespread depression of the 20th century. In the 21st century, the Great Depression is ...
