The Carbon Cycle | Earth Science | Quiz | Visionlearning

The carbon cycle involves a series of processes by which carbon compounds are interconverted in the environment. Carbon flows between each reservoir on the earth in an exchange called the carbon cycle, which has slow and fast components. Test out what else you know about this cycle by taking up the quiz below.

A Quiz About The Carbon Cycle - ProProfs Quiz

That's the Carbon Cycle. There are additional parts to the cycle: for example, carbon can be trapped in rocks, and then released in volcanoes after hundreds of millions of years. But that goes beyond our goals for right now. I've taken most of what you've read above, and put it into musical

form in my Carbon Cycle song.
