Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

You can use 26 nested SUBSTITUTES to remove all alphabetic characters from the text.. If anything is left over, the cell contains non-alpha characters. And thanks to @RaGe for pointing out that you need to check for empty cells as well:

Check if cell contains Non-Alpha characters in Excel ...

As the chief constituent (or main ingredient) of the cell walls of plants, cellulose performs a structural or skeletal function. Just as our hard, bony skeletons provide attachment points for our muscles and support our bodies, so the rigidity or stiffness found in any plant is due to the strength of its cell walls.

Cellulose - humans, body, used, water, process, Earth ...
