Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.. Typically, then, financial modeling is understood to mean an exercise in either asset pricing or ...

Managerial economics deals with the application of the economic concepts, theories, tools, and methodologies to solve practical problems in a business. In other words we can say that managerial economics is the combination of economics theory and managerial theory. It helps the manager in decision making and acts as a link between practice and theory".
