Habitat Animal Printouts. The Earth has many different environments, varying in temperature, moisture, light, and many other factors. Each of these habitats has distinct life forms living in it, forming complex communities of interdependent organisms. A complex community of plants and animals in a region and a climate is called a biome.

A biome is an ecological community of plants and animals, soil and water and air, living together in a particular climatic zone. There are six land biomes: arctic tundra, taiga, temperate deciduous forest, tropical rain forest, tropical savannah, and desert. Each biome has specific climatic conditions - temperature, precipitation amounts, soil conditions, vegetation, and animals.

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.
