Language Proof And Logic Answers

Classical logic is a 19th and 20th century innovation. The name does not refer to classical antiquity, which used the term logic of Aristotle. In fact, classical logic was the reconciliation of Aristotle's logic, which dominated most of the last 2000 years, with the propositional Stoic logic. The two were sometimes seen as irreconcilable.

Logical consequence (also entailment) is a fundamental concept in logic, which describes the relationship between statements that hold true when one statement logically follows from one or more statements. A valid logical argument is one in which the conclusion is entailed by the premises, because the conclusion is the consequence of the premises. The philosophical analysis of logical ...

Aristotle: Logic. Aristotelian logic, after a great and early triumph, consolidated its position of influence to rule over the philosophical world throughout the Middle Ages up until the 19th Century. All that changed in a hurry when modern logicians embraced a new kind of mathematical logic and pushed out what they regarded as the antiquated and clunky method of syllogisms.

Every now and then I get caught out by a spellchecker around the word asterisk.. I can accept that this is the correct spelling, however I hear a lot of people pronouncing it as asterix also.. Is it just me and this is a gradual changing of the word and most people are doing it or am I hearing things because I make the mistake myself?

What is the correct pronunciation and spelling of "asterisk"?
