The dot metacharacter from the last lesson is pretty powerful, but sometimes too powerful. If we are matching phone numbers for example, we don't want to validate the letters "(abc) def-ghij" as being a valid number!

Lesson 3: Matching specific characters - RegexOne

Inquiry-based learning (also enquiry-based learning in British English) is a form of active learning that starts by posing questions, problems or scenarios. It contrasts with traditional education, which generally relies on the teacher presenting facts and his or her knowledge about the subject. Inquiry-based Learning is often assisted by a facilitator rather than a lecturer.

Inquiry-based learning - Wikipedia

The first row of the keyboard, the Z-X-C-V-B row cannot claim the importance in the pursuit of touch typing of the home row. Nor can it contest the international fame or high profile of the hard working QWERTY row. But there is one way in which it can surpass them both.

free typing tutorial, the first row - lesson three

Previously in Lesson 4, it was mentioned that there are two different ways to connect two or more electrical devices together in a circuit. They can be connected by means of series connections or by means of parallel connections. When all the devices in a circuit are connected by series connections, then the circuit is referred to as a series circuit.
