FAQ of demagnetize a magnet How do you demagnetize a magnet? Magnetism is a result of the alignment of magnetic dipoles in material into a general direction.

### **FAQ:How do you demagnetize a magnet**

There are 79 known moons of Jupiter. This gives Jupiter the largest number of known moons with reasonably stable orbits of any planet in the Solar System, if one doesn't count the moonlets within Saturn's rings. The most massive of the moons are the four Galilean moons, which were independently discovered in 1610 by Galileo Galilei and Simon Marius and were the first objects found to orbit a ...

When it comes to classifying stainless steel as having magnetic properties, there is not a simple yes and no answer. Instead, the proper response would be to state that it depends. Here is some information about stainless steel that will help to identify situations in which this alloy exhibits magnetic properties, and when it does not.

Note added October 2005: In creating this page I have been helped much by the journal papers, and web resources of John Bachall. John passed away in August, 2005. At least for the time being, his webpage at the Institute for Advanced Study in Princeton, remains active, and I will keep those links here as long as I can.
