The framework we use (see Figure 1) is a honeycomb of seven functional building blocks: identity, conversations, sharing, presence, relationships, reputation, and groups. Each block allows us to unpack and examine (1) a specific facet of social media user experience, and (2) its implications for firms.

Many factors go into the decision of how to classify certain data. These factors include the following: Value: Value is the number one criterion. Not all data has the same value. The home address and medical information of an employee is considerably more sensitive (valuable) than the name of the chief executive officer (CEO) and the main telephone number of the company.

Apartment buildings are multi-story buildings where three or more residences are contained within one structure. Such a building may be called an apartment building, apartment complex, flat complex, block of flats, tower block, high-rise or, occasionally, mansion block (in British English), especially if it consists of many apartments for rent. A high-rise apartment building is commonly ...
