A global catastrophic risk is a hypothetical future event which could damage human well-being on a global scale, even crippling or destroying modern civilization. An event that could cause human extinction or permanently and drastically curtail humanity's potential is known as an existential risk.. Potential global catastrophic risks include anthropogenic risks, caused by humans (technology ...

Global catastrophic risk - Wikipedia

Clinical trials are regulated research studies that try to find better ways to prevent, screen for, diagnose or treat a disease. These critical studies answer specific questions about new interventions—which can be new vaccines, drugs and devices—and measure their effectiveness and safety for patients. The Food and Drug Administration (FDA) regulates clinical trials in the U.S.
