PROBLEM: When I minimize a remote desktop session and restore it, the remote desktop screen shows up black. This only happens when connecting to a particular computer. DETAILS: If I start clicking around in the black area, portions of the screen will start redrawing and showing up correctly. For example, if I leave a window open in the remote session and click where that window is located on ...

Remote Desktop Session Black after Minimize - Server Fault

As others have correctly pointed out, the first part of the ternary needs to return true or false and in your question the return value is a jQuery object.. The problem that you may have in the comparison is that the web color will be converted to RGB so you have to text for that in the ternary condition.. So with the CSS:

javascript - How to write ternary operator condition in ...

There's a different reason why you should forward to your ISP DNS servers... you'll look like an ordinary client to them. If you don't and they see you have a system that's sending DNS queries all over the world, they're going to assume you're running a DNS server and might just throw a firewall rule in your face and hose you.

Running DNS locally for home network - Super User

Welcome to Technical Leader and Software Engineer Tugberk Ugurlu's home on the interwebs! Here, you can find out about Tugberk's conference talks, books and blog posts on software development techniques and practices.

Tugberk Ugurlu @ the Heart of Software

The answer is Internet Explorer Enhanced Security Configuration. if you want to see what it does, open IE and click the link "Effects of Internet Explorer Enhanced Security Configuration" to see the list of config settings.To install, do it the easy way, and just download the offline installer on another box and copy over to the server. Its just plain easier than configing IE to allow the ...

Good article, Duncan, and a worthy topic. In fact, this is something I've been mulling over as well. I am absolutely convinced that too many virtualization architects don't take IOPS into consideration when planning datastores or placing VMs.

IOps? - Yellow Bricks

CSS Scrolling Tables is a big topic. Lots of people have asked questions about how to keep the headings fixed, but are not always finding good answers.

CSSBakery: CSS Scrolling Tables with Fixed Headings

Hardware aliasing occurs when the same logical address can access different physical memory locations. This is a problem for software on some embedded systems and more generally when hardware becomes faulty in irretrievable locations, such as on a Mars Lander.
