Let's start with that last question, the one about protocols. Protocols are step-by-step approaches to inducing lactation or relactation. Your protocol answers most of the other questions, because it suggests your specific procedure for inducing lactation or relactation: details about hand expressing, pumping, nursing, medications, herbs, and more.

I'm 11 weeks pregnant and need to stop breastfeeding my toddler, who wakes up twice a night to be fed. I've tried feeding her right before she goes to sleep, not going to her in the night, giving her cows' milk instead of breast milk, and having her father comfort her -- but nothing works.

How can I wean my toddler from breastfeeding? - BabyCenter

Is a doula worth it? Well, that's up to you. There can be huge benefits to having a doula. First, because they will be with you all the way through your pregnancy and labour (Bohren et al, 2017). That means you get to know them well, which can be very reassuring - especially if your maternity service can't provide the same continuity.

What is a doula? Your questions answered | NCT

Two cases of HIV transmission from mother to infant during the breastfeeding period when mothers had an undetectable viral load have been reported by PROMISE, a large international study of the effectiveness of antiretroviral treatment in preventing vertical HIV transmission. The findings were ...
