Solutions B-SENS makes use of high level and up-to-date facilities and benefits from 15+ year expertise in the field of fiber Bragg gratings developed through continuous research and development projects.

B-SENS ~ Creative Sensing Solutions

In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation.

In algebra, a cubic function is a function of the form $y = ax^3 + bx^2 + cx + d$ in which a is nonzero.. Setting $f(x) = 0$ produces a cubic equation of the form $ax^3 + bx^2 + cx + d = 0$. The solutions of this equation are called roots of the polynomial $f(x)$. If all of the coefficients a , b , c , and d of the cubic equation are real numbers, then it has at least one real root (this is true for all odd degree polynomials).
