The central point of my Jacobin piece on the state of economics was meant to be: Whatever you think about mainstream macroeconomic theory, there is a lot of mainstream empirical and policy work that people on the left can learn from and engage with — much more than there was a decade ago. 1 . Some of the most interesting of that new work is from, and about, central banks.

where g_t is the trend growth rate of the natural rate of output and z_t captures other determinants of r^* . Note that we assume a one-for-one relationship between the trend growth rate of output and the natural rate of interest, which corresponds to assuming $\sigma = 1$ in Eq. (). In Laubach and Williams (2003), we estimated this relationship and found a coefficient of close to unity.
