There are two classes of solution, called the Bessel function of the first kind and Bessel function of the second kind. (A Bessel function of the third kind, more commonly called a Hankel function, is a

special combination of the first and second kinds.)Several related functions are also defined by slightly modifying the defining equations.

Course Overview. Information is something that can be encoded in the state of a physical system, and a computation is a task that can be performed with a physically realizable device. Therefore, since the physical world is fundamentally quantum mechanical, the foundations of information theory and computer science should be sought in quantum physics.
