Paul Andersen describes three main characteristics of life that are conserved in all organisms on the planet. The universal genetic code, the central dogma of biology, and shared metabolic pathways give us details of the original universal ancestor.

005 - Essential Characteristics of Life — bozemanscience

Examples of Deciduous Trees Oak. There are about 450 species in the oak genus, Quercus, which includes trees and shrubs. Some of the more common oak species are black, English, white, red and bur. Asian oak species include Mongolian, Oriental, Japanese, daimyo and sawtooth.

Deciduous Trees - Definition, Types, Examples & Quiz ...

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

A crocodile's physical traits allow it to be a successful predator. Its external morphology is a sign of its aquatic and predatory lifestyle. Its streamlined body enables it to swim swiftly; it also tucks its feet to the side while swimming, making it faster by decreasing water resistance. Crocodiles have webbed feet which, though not used to propel them through the water, allow them to make ...
