Logic (from the Ancient Greek: λογική, romanized: logikḗ) is the systematic study of the form of valid inference, and the most general laws of truth. A valid inference is one where there is a specific relation of logical support between the assumptions of the inference and its conclusion. In ordinary discourse, inferences may be signified by words such as therefore, thus, hence, ergo ...

In mathematics and mathematical logic, Boolean algebra is the branch of algebra in which the values of the variables are the truth values true and false, usually denoted 1 and 0 respectively. Instead of elementary algebra where the values of the variables are numbers, and the prime operations are addition and multiplication, the main operations of Boolean algebra are the conjunction and denoted ...

Recently I have found a persistent line of questioning in reference to the traditional understanding of the Lord's promise to the Church: the gates of Hell shall not prevail against it (Matt 16:18) . Yesterday on the blog a reader stated the question quite well: This is just a curiosity question, but why is it ... Continue reading "What the Lord means when He says the "Gates of Hell will ...

A week after the Lion Air crash last October, Boeing issued a service bulletin to all airlines operating the MAX that identified a new flight control system on the airplane, known as MCAS, that had erroneously activated on the Lion Air Flight due to a faulty sensor. My stories quickly focused on the potential design flaws in this system. By January, I was following leads that indicated the ...
