Light Waves, Color & Matter Flashcards | Quizlet

Apart from the electromagnetic waves, there are also matter waves, like water waves and sound waves. These travel at a much lower speed. Whereas light can travel in a vacuum, i.e. a place with no particles (like empty space), matter waves need a medium, i.e. particles, to travel in. That's how light can travel in space, but sound cannot.

Light Waves Worksheet - EdPlace

(Sample Answer: Some matter will either allow light to pass directly through such as a clear glass and is described as transparent. Some matter will prevent light from passing through (an opaque object) and will either cause light to reflect (like a mirror) or absorbed such as a table with a black surface.
