A systematic review of literature was conducted using PubMed over the last 10 years (from December 2008 to November 2017) for all published reports on the major lifestyle factors associated with male infertility (). The inclusion criterion was English language studies reporting on the lifestyle factors associated with male infertility such as 'smoking', 'alcohol', 'marijuana ...

Lifestyle causes of male infertility - ScienceDirect

As with most tetrapods, canine copulation involves the male mounting the female from behind, a position that is referred to as "doggy style" but does not have a specifically known origin. When a male canine is interested in mounting a female, he will sniff the female's vulva. If the female is

unreceptive, she may sit, lie down, snap, retreat, or otherwise be uncooperative.

Canine reproduction - Wikipedia

Cetaceans' reproductive organs are located inside the body. Male cetaceans (whales, dolphins, and porpoises) have two slits, the genital groove concealing the penis and one further behind for the anus. Cetaceans have fibroelastic penises, similar to those of Artiodactyla. The tapering tip of the cetacean penis is called the pars intrapraeputialis or terminal cone.

Penis - Wikipedia

Active ingredients in sunscreens come in two forms, mineral and chemical filters. Each uses a different mechanism for protecting skin and maintaining stability in sunlight. Each may pose hazards to human health. The most common sunscreens on the market contain chemical filters. These products typically include a combination of two to six of these active ingredients: oxybenzone, avobenzone ...

Endocrine disruption: The European commission has determined that there is sufficient evidence that DBP and DEHP leads to endocrine disruption in living organism. In addition, the Endocrine Disruption Exchange (TEDX) includes DEP, DEHP, and DBP as endocrine disruptors. Two decades of research suggest that phthalates disrupt hormones, which can lead to harm during critical periods of development.
