Medical decision-making in the paediatric population is complicated by the wide variation in physical and psychological development that occurs as children progress from infancy to adolescence. Parents and legal guardians are the de facto decision-makers in early infancy, but thereafter, the roles of parents/legal guardians and paediatric patients become ever more complex.

Making Sense of Sgarbossa's Criteria - Chest Pain and Left Bundle Branch Block - Part 3. In this final part of the series I'd like to talk about Smith's modification to Sgarbossa's criteria and the importance of serial ECGs. If you recall there are two main problems with using 5 mm as an arbitrary cut-off for discordant ST-elevation in the presence of left bundle branch block.
