The Senaptec Strobe is designed to train the connections between an individual's eyes, brain, and body. Using liquid crystal technology, the lenses flicker between clear and opaque, removing visual information and forcing the individual to process more efficiently. The Senaptec Strobe can be integrated into existing sports training drills and exercises, or to vision therapy protocols as an ...

The primary bookkeeping record in single-entry bookkeeping is the cash book, which is similar to a checking account register (in UK: cheque account, current account), except all entries are allocated among several categories of income and expense accounts.Separate account records are maintained for petty cash, accounts payable and receivable, and other relevant transactions such as inventory ...

Bookkeeping - Wikipedia

The spinning mule is a machine used to spin cotton and other fibres. They were used extensively from the late 18th to the early 20th century in the mills of Lancashire and elsewhere. Mules were worked in pairs by a minder, with the help of two boys: the little piecer and the big or side piecer.

Fluid mechanics is the study of the flow of fluids, and is sometimes known as hydrodynamics. Properties normally ascribed to fluids include density ρ , compressibility β (sometimes specified in terms of the so-called second viscosity coefficient λ), and dynamic viscosity η . In general, the motion of fluids is extremely complicated, including highly nonlinear phenomena like ...

Fluid Mechanics -- from Eric Weisstein's World of Physics

Laser scanners play a key role in quality assurance. 3D digital capture of shapes and surfaces using lasers is an effortless and precise process. The industry uses laser scanners primarily for the quality control of geometries and surface, but also for reverse engineering, fit and finish, and assembly applications.
