These Habits of Mind seldom are performed in isolation; rather, clusters of behaviors are drawn forth and used in various situations. For example, when listening intently, we use the habits of thinking flexibly, thinking about our thinking (metacognition), thinking and communicating with clarity and precision, and perhaps even questioning and posing problems.

I've been working on some clustering techniques to identify cell types from DNA methylation data. When you dive into the literature on clustering, two things become immediately apparent: first, clustering is fundamental to many scientific questions, and second, there is "distressingly little general theory" on how it works or how to apply it to your particular data.
