Mastery learning (or, as it was initially called, "learning for mastery") is an instructional strategy and educational philosophy, first formally proposed by Benjamin Bloom in 1968. Mastery learning maintains that students must achieve a level of mastery (e.g., 90% on a knowledge test) in prerequisite knowledge before moving forward to learn subsequent information.

**Mastery learning - Wikipedia**

Most current applications of mastery learning stem from the work of Benjamin S. Bloom (1971, 1976, 1984), who considered how teachers might adapt the most powerful aspects of tutoring and individualized instruction to improve student learning in general education classrooms.

Benjamin Samuel Bloom (February 21, 1913 – September 13, 1999) was an American educational psychologist who made contributions to the classification of educational objectives and to the theory of mastery learning. He is particularly noted for leading educational psychologists to develop the comprehensive system of describing and assessing educational outcomes in the mid-1950s.

We always start with the array task cards, which are incredibly popular among my kids, no matter their level of understanding is. In fourth grade, we have also been working on factors and multiples, so of course, I have a set of those as well. I also have them use building equations task cards and 2 different problem solving sets.
