- Protoindustrialization (is the economic development that occurred just prior to the rise of the factory system and may have led to it. Protoindustrialization, a.k.a. the putting out system, was a system in which merchants distributed raw materials to peasants' households, who would process it, and then would pick it up and sell it.

Why does your dog have cancer? Dogs live a lot longer now than when I was young and for some reason, whether it is because of their longer life spans (increased genetic mutations) or because of all the carcinogens in the air and water and the toxins in the commercial food we are forcing them to eat, there is a lot more cancer diagnosed in dogs.
