In this section we will introduce two problems that we will see time and again in this course : Rate of Change of a function and Tangent Lines to functions. Both of these problems will be used to introduce the concept of limits, although we won't formally give the definition or notation until the next section.

### **Calculus I - Tangent Lines and Rates of Change**

As you can see, the 4% value is actually somewhat of a worst-case scenario in the 65 year period covered in the study. In many years, retirees could have spent 5% or more of their savings each year, and still ended up with a growing surplus.

### **The 4% Rule: The Easy Answer to “How Much Do I Need for ...**

The oldest known sundial is from Egypt; it dates back to around 1500 BC (19th Dynasty), and was discovered in the Valley of the Kings in 2013. Sundials have their origin in shadow clocks, which were the first devices used for measuring the parts of a day. Ancient Egyptian obelisks, constructed about 3500 BC, are also among the earliest shadow clocks.

I assume entropy was mentioned in the context of building decision trees.. To illustrate, imagine the task of learning to classify first-names into male/female groups. That is given a list of names each labeled with either m or f, we want to learn a model that fits the data and can be used to predict the gender of a new unseen first-name.. name gender ----- Now we want to predict Ashley f the ...

### **math - What is "entropy and information gain"? - Stack ...**

The question-answer relationship (QAR) strategy helps students understand the different types of questions. By learning that the answers to some questions are "Right There" in the text, that some answers require a reader to "Think and Search," and that some answers can only be answered "On My Own," students recognize that they must first consider the question before developing
