1. Introduction and background. In Europe around 75% of the population lives in urban areas and this number is expected to increase to 80% by 2020 (Anderson and Galatsidas, 2014, EC, 2014).As cities become more and more economically productive, urbanisation trends are likely to lead to even further deterioration of natural resources, aggravation of climate change and other environmental ...

Whenever possible, repeat a measurement several times and average the results. This average is generally the best estimate of the "true" value (unless the data set is skewed by one or more outliers which should be examined to determine if they are bad data points that should be omitted from the average or valid measurements that require further investigation).
