Hair is an accessory organ of the skin made of columns of tightly packed dead keratinocytes found in most regions of the body. The few hairless parts of the body include the palmar surface of the hands, plantar surface of the feet, lips, labia minora, and glans penis. Hair helps to protect the body from UV radiation by preventing sunlight from striking the skin.

In physical cosmology, structure formation is the formation of galaxies, galaxy clusters and larger structures from small early density fluctuations. The universe, as is now known from observations of the cosmic microwave background radiation, began in a hot, dense, nearly uniform state approximately 13.8 billion years ago. However, looking in the sky today, we see structures on all scales ...

Chapter A-5 What is a situation (body, language, ..... )? It is time to ask: What are situations? Why do they imply further steps? What is the link between situations, the body, and language, such that words come to us to say in situations? And, how do just the right words come — the ones that might make the situational difference we need?. What is a situation?
