Biology Textbooks :: Free Homework Help and Answers :: Slader

A community is a set of populations of living organisms that live in the same region and interact with each other. In ecology, a population is a set whose members (living in a given place at a given time) are part of the same species. A community is a set of populations of different species (living in a given place at a given time).

Ecosystems - Biology Questions

Biology is divided into different fields of study. Some fields focus on the study of living systems at different levels. These levels include, from smallest to largest: molecules, cells, groups of cells, organisms, populations, communities, ecosystems, and the biosphere. 1-4 Tools and Procedures Most scientists use the metric system when
