The ValvTEX™ technology platform is a proprietary process enabling the application of an ultra-low profile cover for structural heart implants, assembled onto the frame without the need for sutures.. It draws on three main capabilities from Aran Biomedical's extensive technology portfolio, namely custom implantable fabric development, high precision coatings and thermal forming of textiles.

Biomedical engineers work in teams with scientists, healthcare workers, or other engineers. Where and how they work depends on the project. For example, a biomedical engineer who has developed a new device designed to help a person with a disability to walk again might have to spend hours in a hospital to determine whether the device works as planned.
