The critical period hypothesis is the subject of a long-standing debate in linguistics and language acquisition over the extent to which the ability to acquire language is biologically linked to age. The hypothesis claims that there is an ideal time window to acquire language in a linguistically rich environment, after which further language acquisition becomes much more difficult and effortful.

A circle is the set of points in a plane that are equidistant from a given point O. The distance  $r$  from the center is called the radius, and the point O is called the center. Twice the radius is known as the diameter  $d=2r$ . The angle a circle subtends from its center is a full angle, equal to 360 degrees or  $2\pi$  radians. A circle has the maximum possible area for a given perimeter, and the ...
