Boyle's Law . Torricelli's experiment did more than just show that air has weight; it also provided a way of creating a vacuum because the space above the column of mercury at the top of a barometer is almost completely empty. (It is free of air or other gases except a negligible amount of mercury vapor.)

Things are a bit different when you need to find the volume, pressure, or temperature of a gas not at STP. You will need to solve $PV = nRT$ for the dimension you need to find and attach it to the end of the sequence using the roadmap to find 'n' for the gas. Let's take another problem based on

the same chemical equation to explore how to set up finding a gas not at STP.
